

METIS

DRS 5075

**The perfect merging between extreme quality
and productivity for the most demanding market**

METIS

It's the last born in the DRS family, the DRS 5075 not only benefits of all the technology developed by METIS in the previous models but also introduces new important features which have no comparison in any other system on the market such as the innovative *DC SynchroLight* lighting system (Dynamically Controlled Synchronized Light) which incorporates a new technology developed by Metis, covered by patents deposited in 2010, which allows to dynamic control the light in the scanning area. The *DC SynchroLight* technology gives the ability to control and change dynamically, instantly and automatically the angle and intensity of the light emitted by the light sources in the scanning area, making it possible to optimize the result of the digitization, depending on the type and nature of the originals and thus providing results previously unreachable.

The DRS 5075 is a professional system designed in order to respond to a specific requirement of the market: the "non-invasive" high quality digital reproduction of maps, books, drawings and parchments and is characterized by superior benefits in terms of: quality, productivity, ergonomics, reliability, compactness and solidity. Some of the new benefits introduced by the DRS 5075 system are: high scanning speed; perfect zenithal vision; a highly automated electronic book cradle capable of handling books over 30cm of thickness; an unmatched lighting system with *DC SynchroLight* technology for light schematic variations; a driving software extremely powerful and complete. The optical and lighting design adopted allows very high precisions, resolution and color fidelity, without compromising the extremely rapid acquisition times. The integration with the automatic book cradle allows high productivity in full respect of the originals.

DRS 5075 General Features

- Maximum original format: 50x75cm
- Image Sensor: Tri-linear CCD by Kodak, 3x12 = 36 bit
- Optical Resolution: 400 PPI (adjustable up to 800 PPI)
- Very Large Depth of Field (user selectable)
- Focusing: fine adjustable by Software control
- Lighting: new *DC SynchroLight* system, LED based, (IR/UV free) active only during the scanning process provide for thousands of different light schematics
- High grade precision and reliable mechanic
- Automatic Book Cradle for books up to 50x75cm and 30cm thick with fine pressure adjustment; motorized glass; fully adjustable and user customizable
- Modular system can be easily assembled/disassembled in small parts for easy transportation
- Size (cm): Height 180, Length 140, Width 140
- Weight: ~ 300 Kg

DRS 5075 Performances

High real productivity including: original positioning, scanning, image processing, saving on local hard drive or network and book cradle operativity. 450 A4 pages x hour, for an A3 book (two A4 pages), 300PPI, in colour, in "Best Quality" Mode.

Main DRS Software Features

- Native 64bit software and processing
- Customizable user Profiles for workflow optimization and system settings retrieving
- Fast Preview for real-time adjustments
- Manual/automatic crop: up to 8 originals/pages
- Lighting calibration and Gray Balance tools
- Color/density tools: exposure, contrast, highlight, shadows, gamma, automatic adjustments, black and white points, histograms and point analysis, ICC color profiles, paper color correction, etc.
- Unsharp masking, despeckle, deskew, etc.
- User customizable macro tools for automatic file labelling
- Full Resolution image view immediately after the scan with History window, LOG file, etc..
- Completely automatic workflow allows operating the system directly from the front through foot pedal commands

Workstation Minimal Requirements

- Latest Intel Processor
- 8 GigaBytes RAM
- Microsoft Windows 7 (64bit)

Product specification or appearance may change without prior notice. - V.11/05a-ENG
